Summary

A list of help topics related to Query tool.

Main article: TutorialsSummary

Query Module

The Query module offers tools (e.g. the Query tool) that help researchers to search for studies and/or forms, filter data, download data, and also to create orders for biosamples.

Topics

- Order manager - explains how to use the Order Manager, to create orders for bio samples [\[UPDATED\]](#)
- Query tool - explains how to use the Query tool.
- Sample queries - contains a set of query examples to help the user with the Query tool [\[UPDATED\]](#)
- Requesting an account - explains how to request a new user account [\[UPDATED\]](#)
